

THE SOUND SIDE
G R O U P

Cabling Services

Providing technology solutions and services to Eastern North Carolina

The SoundSide Group understands the ever increasing demand for data throughput. Cost effective network infrastructure deployment is critical to success. The SoundSide Group incorporates the latest industry solutions that promote operational efficiency as well as reduce and control operating costs.

In today's world, rapid advancements in computing and telecommunications are altering the way people work and impacting overall productivity. Cabling is at the heart of every network, with communications and the fast and accurate delivery of information being among an organization's most important business priorities. The SoundSide Group is committed to providing powerful, flexible solutions for voice, data, and video, while offering a balance between performance and compatibility as well as investment. With 90% of all networking problems traceable to the physical layer (cabling), a robust foundation is required to ensure ideal network performance.

The SoundSide Group offers connectivity solutions including Cat5e, Cat 6, Single and Multi mode Fiber, while remaining focused on the basics:

- Performance
- Productivity
- Reliability
- Flexibility
- Speed
- Stability
- Security
- Manageability

The Experience. The Technology. The Vision.
