"The SoundSide Group provides backup for our small IT department, and they help us with IT support functions such as network administration, server and desktop upgrades, phone system installation, and cabling. When we were experiencing rapid growth, they were instrumental in helping us adjust to our changing IT needs. They installed data and voice wiring in new construction and helped us with needed upgrades. Their consistent level of service is very important to us, and I can trust that The SoundSide Group will always follow through on the work."

- Amy Boyd, Information Systems Manager, Beaufort County Hospital
